

# IT Networking Solutions & Consulting

**OMA Comp installs, organizes and maintains** servers, workstations and IT equipment so that your business can work at its maximum efficiency. We keep you current and up to date with the newest and most advanced IT protocols. Give us a call as soon as problems arise and we will address them right away, often without an on-site visit via remote access, right from our offices.

We'll give you tips on keeping your computer safe, clean, and reliable for years to come. OMA Comp also specializes in the backup process, making sure that all of your important files are protected, as well as imaging backups capable of rapid restoration of servers and computers to provide disaster recovery and minimize downtime.
